This attempt took 14 minutes.

	Question 1	1 / 1 pts
	"Every child is younger than his mother" can be represented by t following first-order logic formula. $\forall x \ (C(x) \to Y(x, \ m(x)))$ Which of the options is the category of C?	he
	○ Variable	
	Object constant	
Correct!	Predicate	
	<ul><li>Quantifier</li></ul>	
	Function constant	

**Question 2** 

1 / 1 pts

Which of the following statements are true for any first-order formula F and G, and for any interpretation I?

- 1.  $(F \wedge G)^I = \wedge (F,G)$
- 2.  $(\neg F)^I = \neg (F^I)$
- 3.  $\exists w F(w)^I = t$  iff, for some object constant  $c, F(c)^I = t$ 
  - 1, 2

Correct!

- 2
- 3
- 1, 3

**Question 3** 

1 / 1 pts

Which of the options best represents the English sentence "dogs and cats are animals"?

- $\bigcirc$   $\forall x (dog(x) \land cat(x) \rightarrow animal(x))$
- $\bigcirc \ \, \forall x (\text{dog}(x) \land \text{cat}(x) \land \text{animal}(x))$
- $\bigcirc$   $\forall$ x(dog(x)  $\lor$  cat(x)  $\lor$  animal(x))
- Correct!
- $\bigcirc$   $\forall x (dog(x) \lor cat(x) \rightarrow animal(x))$

**Question 4** 

1 / 1 pts

Assume that the signature consists of the object constant Me, the unary predicate constant Male, and the binary predicate constant Parent, and nothing else. Which of the following first-order logic formulas express the following English sentence?

## "I have no daughters"

Choose all that apply. (Hint: there are 2 correct answers.)

Correct!

- $\neg \exists x (\neg Male(x) \land Parent(Me, x))$
- $\exists x(Male(x) \land Parent(Me, x))$

Correct!

- $\bigvee$   $\forall$ x (Parent(Me, x) -> Male(x))
- $\forall x (Male(x) \land \neg Parent(Me, x))$

Question 5 1 / 1 pts

Let P be the only predicate constant that is unary, and I an interpretation such that the universe is the set of all ASU students. For any  $\xi \in |I|$ , P^I( $\xi$ ) = t iff  $\xi$  has taken CSE 579. Which of the following first-order logic formulas express the following English sentence?

"There exists at most one student who took CSE 579."

Choose all that apply.

Correct!

 $\forall x \forall y [(P(x) \land P(y)) \rightarrow (x=y)]$ 

Correct!

- $[(\exists x P(x)) \land (\forall x \forall y (P(x) \land P(y)) \rightarrow (x=y))] \lor (\neg \exists x P(x))$
- $[(\exists x P(x)) \land (\forall x \forall y (P(x) \land P(y)) \rightarrow (x=y))]$

Question 6 1 / 1 pts

Let the underlying signature be {a, P, Q}, where a is an object constant, P is a unary predicate constant, and Q is a binary predicate constant. Assume object variables range over the set N of nonnegative integers, and the signature is interpreted as follows:

- a represents the number 10,
- P(x) represents the condition "x is a prime number,"
- Q(x, y) represents the condition "x is less than y."

Which of the following first-order logic formulas express the following English sentence?

"x equals 9."

Choose all that apply.

_	
$\Omega(2)$	v)
Wa.	ΧJ
G( G,	/ \ /

Correct!

 $Q(x, a) \land \neg \exists y [Q(x, y) \land Q(y, a)]$ 

(0	x)^	-D	()
12	$\times 1 \wedge$	$\neg P$	[ X ]

Correct!

 $\mathbb{Q}(x, a) \land \forall y[Q(x, y) -> (y = a \lor Q(a, y))]$ 

	Question 7	1 / 1 pts
	Is the following first-order formula satisfiable?  ∀xy(x = y)	
	<ul> <li>Unsatisfiable</li> </ul>	
Correct!	Satisfiable	

Question 8

1 / 1 pts

Let  $\sigma$  be the signature {a, b, P} where a, b are object constants and P is a binary predicate constant. Choose all Herbrand interpretations of  $\sigma$  that satisfy the following formula.

 $\forall x,y \ (P(x,y) \to P(y,x))$ 

P(a,b)

Correct!

{P(a,a)}

Correct!

{P(a,a), P(a,b), P(b,a)}

Correct!

∅ (empty set)

**Question 9** 

1 / 1 pts

Find the Herbrand model I of the following first-order formula whose signature is {a, b, P}.

 $(\neg P(a) \lor \bot) \land (\exists x P(x))$ 

Correct!

$$P(a)' = f, P(b)' = t$$

$$P(a)' = t$$

$$P(a)' = t, P(b)' = t$$

$$\square P(a)' = f$$

**Question 10** 

1 / 1 pts

	Which option contains the free variables in the following formula? $\exists y P(x,y) \land \neg \exists x P(x,y)$
Correct!	Both x and y
	○ x
	No free variable
	Оу

Quiz Score: 10 out of 10
